

Lab 05 — Refresh the Dashboard and Send the Summary

Topic 02 · Tools and Skills

Meridian Capital Partners Pte Ltd — all data in this lab is synthetic and for training only.

Goal

Quarter end has arrived. You refresh the dashboard you built in Lab 3 using the data Claude now reads from Drive, then have it draft a quarterly summary email to the head of finance. You read the draft against the figures and approve it before a single message leaves your outbox.

You'll build

An updated dashboard plus an approved quarterly summary email sent to yourself.

Tools: Claude Cowork, Live Artefacts, Google Drive connector, Gmail connector

The prompt

Copy this into Claude (it is also in PROMPT.md):

PROMPT — copy into Claude

Two tasks, in order.

1. Open my saved "Meridian Capital Partners — FY2025 Revenue" dashboard and update it from the Meridian Finance folder in Google Drive. Add a Q4 column to the desk breakdown and show each desk's actual against its target.
2. Then draft an email to <YOUR OWN ADDRESS> with the subject "Meridian FY2025 — Q4 revenue summary". In the body:
 - Total FY2025 revenue and the Q4 figure.
 - Each desk's Q4 actual against target, best and worst first.
 - Two sentences explaining the largest variance.
 - A closing line noting the Q4 Advisory target discrepancy.

Show me the draft. Do not send it until I approve it.

Note: Replace <YOUR OWN ADDRESS> with your own email — never a real client's.

Steps

- 1. Reopen the dashboard you saved in Lab 3 from your sidebar.**

You are extending the artefact you already built, not starting a new one.

- 2. Enable the Gmail connector from the plus menu, alongside Google Drive.**

Turn on only the connectors this task needs.

- 3. Paste the lab prompt, replacing the placeholder with your own email address.**

Class exercises always go to a test recipient — yourself.

- 4. Watch Claude refresh the dashboard from Drive and add the Q4 target comparison.**

The data comes from the connector now; you are not attaching files by hand.

5. Check the refreshed dashboard: Q4 revenue should be S\$6,980,000 across the four desks.

Verify the artefact before you let it feed an email to your head of finance.

6. Read the drafted email in full and compare every figure against the dashboard.

Claude asks for explicit approval before sending — this is the moment to use it.

7. Approve the send, then confirm the message arrived in your own inbox.

Approve only once the figures match; if anything is wrong, ask for a correction first.

Check your work

The dashboard shows a Q4 column with actual against target per desk and Q4 revenue of S\$6,980,000. The email arrives in your own inbox with the correct totals and a closing note about the Advisory target discrepancy.

Before you move on

Use only the supplied mock data and your own test accounts. Never put real client, personal or confidential data into a training exercise, and send lab emails to yourself rather than to a real recipient.
