

Lab 01: Create a Cowork Project for Finance Tasks

Create a Finance Task Automation project from this lab folder. Read PROJECT-BRIEF.md and inventory mock-data. Do not edit mock-data. Save a friendly one-page file map to outputs/file-map.md. Tell me what you found, what you will use, and what you will ignore. Pause before moving, deleting, emailing, or publishing anything.

Before finishing, use CHECKLIST.md and list each check as complete or needs review.
